

Electronic Supplementary Material 2

ESM2 Progressive accumulation of G85R-SOD1:YFP pathology in an organotypic spinal cord slice system. Spinal cord slices from G85R-SOD1:YFP animals were incubated with homogenate from a paralyzed G85R-YFP^{recWT-P1} mouse or a non-transgenic (NonTg) mouse as indicated. Inclusions increased in abundance over a span of 20 days incubation.
